MADE IN ITALY
PREMIUM QUALITY AND DESIGN

OVER 65 YEARS OF MADE IN ITALY

Founded in 1948 by the longest standing Italian family in the production of cooking appliances, **Smeg** is now the only appliance company with PRODUCTION EXCLUSIVELY IN ITALY. The company name, in Italian, is an acronym of: **S**malterie **M**etallurgiche **E**miliane **G**uastalla (in English it translates as "Metal Enamelling Factory based in Guastalla, Emilia").

Smeg Architects

What makes Smeg truly unique is their revolutionary view of domestic appliances as working pieces of art. This marriage of form and function is evident in Smeg's collaboration with leading architects in the creation of their kitchen solutions. Design visionaries such as **Guido Canali**, **Renzo Piano**, **Mario Bellini** and more recently, **Giancarlo Piretti**, have all breathed life into Smeg appliances, sculpting architectural masterpieces for kitchens all over the world.

Each of these experts has contributed succinctly to the Smeg way - Technology with Style - creating luxury distinctive appliances that express unique style by perfectly combining design, superior performance and attention to detail.
